RR Donnelley

New York, NY

Data Analytics Intern

June 2016 - August 2016

- Collected data and devised most efficient routes for product delivery, optimizing for cost and time
- Implemented and designed dashboards, and presented current vs. future state findings to senior management
- Constructed database by aggregating market research on key competitors to drive the development of microsites
- Drafted content for internal marketing communications to promote new products, collateral, and sales tools

PROJECTS

[World Happiness](#)

- Developed a Heroku web app examining key variables to help illustrate the importance of happiness within a country
- Utilized Pandas for data wrangling to restructure the raw data
- Created a REST API with Flask using Python as a Server-side Language
- Stored the data in a SQL database and used SQLAlchemy to perform CRUD operations on the data
- Reflected the data onto an HTML page using JavaScript, D3.js, and CSS for visualization

[Mars Mission](#)

- Designed a REST API with Flask that scraped various websites for data related to the mars mission
- Completed initial scraping using BeautifulSoup and automated the browsers actions using Splinter
- Stored the scraped data into a MongoDB database and displayed the information onto an HTML webpage

[Graphing Rent](#)

- Examined how certain population dynamics affect rent pricing in American cities
- Utilized Pandas for data wrangling to restructure the raw data
- Visualized statistical data using Seaborn and Python

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, R, CSS, HTML
- **Data Manipulation & Visualization:** Pandas, Numpy, Matplotlib, Plotly, Beautiful Soup, Seaborn, D3.js, jQuery
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Other:** Flask, Heroku, Git, Tableau, Big Data Analytics with Hadoop, TensorFlow, Sklearn, JSON, Statistics
